

Climate Protection & Energy

Climate Protection Projects

As a founding member of Austrian Carbon Management, denkstatt is in a position to offer integrated services. With EEC and IC Consultants as our cooperation partners we have top performance energy experts on board. Furthermore, we have the support of Raiffeisen Zentralbank Österreich AG (RZB) in financial matters. denkstatt has been with UNFCCC for years now and is therefore at the latest state-of-the-art in international developments.

Performance

denkstatt supports project developers in the course of the whole project by:

- Identification of suitable projects
- Identification of additional finance
- Preparation of the necessary project documentation
- Communication with potential buyers

Our Experience

By the implementation of JI/CDM projects denkstatt concentrates on the following issues:

- Energy management
- Waste management
- Transport

Your Benefits

The identification and implementation of lucrative JI/CDM projects calls for years of practical experience within these topics. denkstatt has this experience through the practical implementation of projects, collaborating with UNFCCC and the cooperation in studies carried out in these fields. Substantial amounts of money and time can be saved by making use of our experience.

Where we work

- Romania - energy efficiency and Fuel Switch
- Kyrgyzstan - natural gas pipeline sanitation
- Ukraine - energy efficiency
- China - Cole Mine Methane Utilization
- Bulgaria - wind power
- Morocco - industrial solar steam production
- Russia - methanol production
- Azerbaijan - Hydro power
- Albania - Hydro power
