Legal Compliance Update

The complexity of European legal provisions makes Compliance a major challenge for organisations in Europe. Nevertheless, legal compliance is a prerequisite for every operating company.

denkstatt can provide support to organisations of all sizes and degrees of complexity in meeting this requirement, and help keep the resources committed for this purpose to a minimum.

Objectives

denkstatt's Legal Compliance service can provide amendments to Austrian federal and provincial as well as EU legislation in a form already preselected and adapted to the company's requirements.

This service helps companies to release in-house resources from research activities and focus on the implementation and realisation of new legal obligations. It also ensures that the company is purposively made aware of the legislation to be complied with.

Process

The basis for the selection of those legal obligations that apply for a company are a site inspection and an intensive discussion with operational staff.

In collaboration with an environmental lawyer denkstatt prepares a quarterly register of all legal amendments in EU law, as well as in Austrian federal and provincial law.

These amendments are adapted to the requirements of the respective company and forwarded by mail, ensuring an Compliance every three months.

Benefits

- Legal Compliance
- Early information concerning investment-effective measures for the compliance with statutory requirements
- Conservation of legal support resources
